XPRESS 1000 RIVIAN KIT

Rivian Approved – XPress 1000 Riveting System

XPress Riveting systems allow the use of many tools for different functions and applications. Due to its modular design, this device can be combined with a variety of hydraulic cylinders and the designated C-arms. When properly equipped, the device is capable of using pressure control for Self-Piercing Rivets, Flow Form Rivets, Blind Rivets, Punching and Calibration, Blind Rivet Nuts. The below configuration represents the required tooling for Rivian-approved repairs.

INCLUDED COMPONENTS
